

Index to the 1870 Agricultural Census for Summit County, Ohio

By Iris Bolar

This index lists agents, owners, and managers of farms in all townships of Summit County in 1870. The Federal Agricultural Census provides data that supplements other genealogical records and provides some insight about an ancestor's land, finances, and farming productivity. Enumerators gathered this census data as they took the population census. Not all farms were counted. In 1870, farms with less than three acres were excluded *unless* they produced products worth \$500 or more for the year. A farm was counted regardless of whether or not the occupant owned or leased the land; owners, tenants and sharecroppers were all listed.

The Agricultural Census recorded the amount of land (improved and unimproved); present cash value (farm and farming equipment); wages paid during the year; number of various livestock; amount of various crops; dairy products produced; quantity of seeds, grain, and other products. The schedules record information across two pages for each person listed.

Names in this index are arranged alphabetically and are transcribed as they appear in the agricultural census, even with misspellings. However, the misreading of the handwriting of census takers may have resulted in the misspelling of some names by the indexer. The location of the farm and the page where the entry can be found in the actual census is provided. Sometimes, a person is listed more than once on a census page. In that case, the number of times a name appears on a page is provided in parentheses next to the page number in this index.

This index was created from National Archives Microfilm Publication T1159, *Federal Non-Population Census Schedules, Ohio, 1850-1880, in the Custody of the State Library of Ohio: Roll 40, 1870: Products of Agriculture – Schedule 3: Seneca, Shelby, Stark, and Summit Counties*. This microfilm is available in the Special Collections Division of the Akron-Summit County Public Library.
