Humberger House  
Village of Clinton  
Summit County, Ohio  

Description  

The Humberger House is located on the west side of North Second Avenue on Warwick Section 18, Lot 2. The house is sited among several mature trees and bushes and a detached garage is situated northwest of the house. A poured concrete driveway is located north of the house and connects the garage with North Second Avenue. Likely constructed shortly after the house, the garage is considered a contributing resource in the nomination.

The Humberger House is a one-and-a-half story, steep-pitched hipped roof, sandstone bungalow. The house’s style is best described as Craftsman. Four gable-roofed, wall dormers (photos 1, 4, and 6) pierce the roofline of the structure. The dormers along the north, east, and south elevations are constructed of rock-faced cut sandstone and have parapeted gables. The dormers all contain one triple window (photo 7). The west elevation’s dormer is clad with wood shingles and has a single, one-over-one window. The roof is clad with asbestos shingles and contains two off center chimney stacks. The house’s eaves contain brackets (rafter tails) that create a “raked-eave” aesthetic (photo 10).

All elevations of the house are constructed of rock-faced cut sandstone and a narrow sandstone water-table extends around the perimeter of the house.

All full-size windows are one-over-one, double-hung sash and have stone lintels and stone lug sills (photo 8). The basement windows are three-light fixed. The house also contains several ribbon mullion windows (photo 13).

The south elevation of the house has a small half-hipped roof entry porch that is constructed of rock-faced
Humberger House  
Village of Clinton  
Summit County, Ohio

Description (continued)

Concrete block (photo 1 and 2). The porch is enclosed and contains ribbon windows and a glass paneled door.

The façade elevation (east) of the house contains a one-story, shed-roofed, enclosed porch, which extends the entire length of the elevation (photo 4, 5, and 13). The porch has four sandstone piers and the remainder of the structure is constructed of rock-faced concrete block. Sandstone steps lead to a central entry, and the porch is enclosed by four large sliding windows with ribbon transoms (photo 13). The door is a nine-paneled glass door. The porch faces Second Avenue.

The house’s west (rear) elevation has a one-story, wood-frame, shed-roofed, enclosed porch, clad with wood-shingle siding (photos 9 and 11). The porch’s west elevation contains a large picture window. A chimney is situated in the south elevation of the porch. The interior of the porch is finished with knotty-pine paneling (photo 12).

The house has a full basement (sandstone foundation) with a concrete floor. There is a basement entryway with stairs located in the southwest section of the basement that leads outside (photo 1).

The Humberger House’s interior has several Craftsman details such as beamed ceilings and pocket doors (photos 13 and 14). The interior also includes original wood trim with molded lintels, baseboards, and sills.

Approximately 25 feet northwest of the house is a two-car garage (photos 15 and 16). The garage is a one-story, wood-frame,

Summit County, Ohio

Description (continued)

hipped-roof structure. The garage is clad with wood siding and contains two overhead doors along the east elevation. The windows are six light fixed. The roof is covered with asphalt shingles. The foundation is glazed ceramic block and the floor is poured concrete.

There is a shed-roofed, lean-to addition along the rear (west) elevation of the structure. According to the present owner, the lean-to was added during the 1930s and served as a chicken coop. The garage is considered a contributing resource in the nomination even though it was built after the house.

Humberger House  
Village of Clinton  
Summit County, Ohio

**Statement of Significance**

The Humberger House meets the registration requirements for properties eligible under Criterion C as specified in the Canal, Railroad, and Industrial Resources of Clinton/Warwick Multiple Property Documentation Form (Clinton MPD).

The Humberger House is significant under Criterion C for embodying the distinctive characteristics of type, period, or method of construction. The Humberger House is a Craftsman Bungalow and contains high style elements such as ribbon windows, raked eaves, and beamed ceilings. Moreover, the building material, sandstone block, is an expression of the importance of the rock quarrying industry in Warwick.

William Humberger, Clara Humberger’s father, served as the president of the Warwick Glass Factory and the operation utilized the large silica deposits in the area to produce glass products and the house serves as an expression of the Warwick Company’s mining and manufacturing operations.\(^1\) The use of sandstone block as a building material is consistent with the Craftsman tradition of employing natural, local material in construction design.\(^2\)

---

\(^1\) According to Virginia & Lee McAlester’s A Field Guide to American Houses, most of the Craftsman style houses that were constructed of stone, brick, stucco, or concrete block are found in northern and midwestern states.

Humberger House  
Village of Clinton  
Summit County, Ohio

**Historical Background**

The Humberger House is located in Clinton within the area formally known as Warwick, a town plotted and organized in 1901. According to the Summit County Tax Auditor’s Duplicates, the Humbergers built the house in 1903 and the property was valued at approximately $1,500.

William Humberger was the business partner of John G. Warwick and ran a dry goods store in Warwick’s brick commercial building in Massillon, Ohio.\(^3\) The 1900 U.S. Census lists Humberger’s occupation as a proprietor of a dry goods store and a resident of Massillon, Ohio.\(^4\) In 1901, William Humberger served as the president of the Warwick Glass Factory.

Isabella Humberger, William’s daughter, was officially listed as the owner of the house in the tax records. However, shortly after the house was built, the deed was transferred to Laura Humberger, William’s wife and Isabella’s mother.\(^5\)

The house remained in the Humberger family until 1915, when Laura Humberger sold the property to Charles Cline (sometimes spelled Klein).\(^6\) Two years later, Cline transferred the property to his wife Amanda.

The detached garage was most likely added during the Clines ownership of the property (photos 15 and 16). The garage’s

Historical Background (continued)

The foundation is clay tile block, a popular building material in Ohio during the first two decades of the twentieth century.\(^7\) The Clinton Story notes that Amanda Cline was a wigmaker and ran a shop out of the garage.\(^8\) It is likely that the rear (west) porch of the house was also added during this time. The foundation material (clay tile block) of both structures is identical. Furthermore, the tax valuation for the property increased in 1915, possibly indicating the addition of the garage.\(^9\)

In 1942, Cline sold the house to Mary Schmitt.\(^10\) Mary was married to Louis Schmitt, the owner of Schmitt Store on North First Street as well as a bar on Hickory Street in Warwick. In the following year, Mary Schmitt transferred the house to her daughter Ann Josephine Schmitt and her husband Elza Benjamin Lee. Ann and Elza Benjamin had one child, Barbara Lee. Elza Benjamin worked as a conductor for the B&O Railroad.

The Lees made only minor alterations to the house, such as the rear addition to the garage (chicken coop) and replacement of the roof with asbestos shingles in the 1940s. Since her mother’s death in 1965, Barbara has retained ownership of the house.

Village of Clinton
Summit County, Ohio

Criterion C: Architecture

The Humberger house is significant under Criterion C: Architecture for its association with the "Industrial Era" of Warwick as in the Canal, Railroad, and Industrial Resources of Clinton/Warwick Multiple Property Documentation Form.

The Humberger house retains significant architectural elements of the Craftsman style, a building style associated with the Industrial Era (1900-1930). The house contains Craftsman features such as raked eaves and ribbon windows. The interior of the house is detailed with beamed ceilings, pocket doors, and leaded-glass-paneled doors. The Craftsman style is indicative of the prosperity of the Industrial Era in Warwick. In 1901, Warwick maintained a glass factory, a furnace foundry, and several silica quarries. In the early twentieth century, the Craftsman style became a popular architectural expression, popularized by the designs of Charles Sumner Greene and Henry Mather Greene, architects from Pasadena, California. The Greens' designs were given extensive publicity in such magazines as Western Architect, The Architect, House Beautiful, Good Housekeeping, Architectural Record, Country Life in America, and Ladies' Home Journal, thus familiarizing the nation with the style. Through these periodicals and magazines, the Craftsman became the most popular and fashionable house in the United States. The Humberger house is an example of this architectural trend in Warwick.

Humberger House  
Village of Clinton  
Summit County, Ohio

**Criterion C: Architecture**

Moreover, the Humberger house is also significant for its building materials—cut sandstone. Humberger was the president of the Warwick Glass factory, one of the major employers in the community. His sandstone house is indicative of the silica mining operation that was a major component of the glass making operation. The Warwick area had several gravel and silica mines and the glass operation depended on silica for its operation. The sandstone for the Humberger house was most likely mined at one of the local quarries, and the building serves as a reminder of heritage of quarrying in the area. The Humberger house is the only building constructed of cut sandstone in the Clinton/Warwick area.

**Historic Integrity**

The historic integrity of the Humberger house is well preserved. All of the nominated buildings have a high degree of historic integrity. The house retains its defining Craftsman features. The house’s cut-sandstone walls, massing and fenestration, and Craftsman elements retain significant integrity of materials and workmanship. The buildings are in the same location they were during the property’s period of significance (1901-1915), experienced no significant alterations, and are effective in communicating their historic functions. The small town setting surrounding the nominated property provides integrity of setting, feeling, and association. The Humberger house reflects the industrial growth period of Warwick.

Barbara Lee
7616 North 2nd Street
Clinton, Ohio 44216

Dear Ms. Lee:

Congratulations on the recent listing of your property into the National Register of Historic Places!

The National Park Service, United States Department of the Interior listed the Humberger House at 7616 North 2nd Street in Clinton, Ohio on October 11, 2002. The nomination was made in connection with a state plan to identify and document prehistoric and historic places in Ohio which qualify for National Register status under provisions of the National Historic Preservation Act of 1966 as amended.

The Ohio Historic Preservation Office (OHPO) is available to advise you in maintaining the historic character of your property. As you know from previous mailings received from this office, there are no restrictions placed on your property following the National Register listing. However, the OHPO strongly encourages owners of historic properties to consider all options before completing work that could damage the structure or impair its historic integrity. Careful planning can facilitate the sensitive incorporation of contemporary alterations with the historic fabric. The OHPO provides free information on how to sensitively rehabilitate and repair historic properties, upon request.

Thank you for your interest in historic preservation and the National Register of Historic Places.

Sincerely,

[Signature]
