The City Directory

Represents Conditions Today—

History Tomorrow

The men who direct the affairs of the city and up-to-date business institutions recognize the fact that the City Directory tells the story of the city's life and keeps it before the world as no other publication does or can do.

It is the logical means of publicity in advertising the city, its industrial, commercial and social advantages.

Patronize the City Directory and you automatically boost your own business.

The sign over your door is a mighty good investment, but just consider how much "mightier" investment the Directory offers you.

THINK IT OVER!
Common Sense

About City Directory Circulation

The true value of advertising circulation is circulation consulted.

To be exact by actual survey in twenty-four average American cities by actual count each city directory averaged three and one-half consultations for each business day.

To be conservative we will eliminate the sixty Sundays and Holidays when no tests were made.

For every thousand directories sold there will be an average of three and one-half daily consultations for each book for three hundred and five days, therefore—

\[
1000 \times 3\frac{1}{2} \times 305 = 1,067,500
\]

Consultations or Circulation Consulted

COMPiled AND PUBLiSHED BY
THE BURCH DIRECTORY COMPANY
AKRON, OHIO
Established 1868
Akron is the Rubber Capital of the World. It is the hub of the globe-girdling rubber empires and their vast networks of retail outlets.

Akron-made products are to be found wherever wheels turn. Aside from thousands of rubber products, Akron area plants turn out matches, automobile rims, clay products, plastics, salt, dies, molds, batteries and chemicals.

Akron, with 100 motor freight terminals, is the center of the trucking industry. Here is the world's largest fishing tackle factory, the site of the All-American Soap Box Derby and the home of the dirigible and blimp.

The Akron Chamber of Commerce is guiding Akron's progress.
AKRON, OHIO

"THE RUBBER CAPITAL OF THE WORLD"

Akron, a northern Ohio city of 288,000 persons, has gained fame through the years for outstanding leadership and contributions in many varied fields.

The city is probably best known as the "rubber capital of the world." It is the hub of the globe-girdling rubber companies whose vast networks of fabrication plants and retail outlets play such an important role in our economy. This vital Akron-born industry alone represents more than four billion dollars annually in production.

GIANT TIRE MACHINERY

Rubber has been the big employer in Akron for nearly half a century. The city is the headquarters for administration, sales, financing, distribution and research for B F Goodrich Co, Goodyear Tire & Rubber Co, Firestone Tire & Rubber Co, General Tire & Rubber Co, and Mohawk Rubber Co. Seiberling Rubber Co is located at nearby Barborton. In addition there are a number of smaller specialty rubber companies in Akron.
Goodyear Aircraft Corporation's impressive Airdock, completed in 1929, was erected to house the rigid airships, USS Macon and USS Akron, each of which was 765 feet long and had a gas capacity of 6,500,000 cubic feet.

The Dock is approximately a semi-paraboloid shape, well described as a half of a silkworm's cocoon, cut in two the long way. It is 1175 feet long, 325 feet wide and 211 feet high. Its 364,000 square feet of floor area makes it the largest single uninterrupted space yet built.

In a comparative sense, the Dock's height is equal to a 22-story building, it is the largest structure in the world without interior support, ten football games could be played simultaneously under its roof. It is so big, in fact, that the engines on the airships can be "run up" inside the structure without discomfort to workers or danger of carbon monoxide poisoning.

In effectively launching and docking huge rigid airships, the Dock had to be designed to reduce air-current interference to a minimum. It was with this thought in mind that Dr. Karl Arnstein, GAC's retired Vice President in Charge of Engineering, specified the building as a semi-paraboloid structure.

The most unique feature of the Dock is probably its identical spherical doors with their supporting trucks and operating mechanism, with individual power plants separately housed at each end of the building. The doors are two-piece and shaped somewhat like one-quarter of an orange peel. Each of the four sections weighs 600 tons. The doors are fastened at the top by huge hollow-forged pins 17 inches in diameter and six feet long. The doors rest on 40 wheels set radially on curved standard railroad track. Time of opening or closing is approximately five minutes.

Akron is also well known as the birthplace of the trucking industry. The enterprising rubber producers, sensing an important new market for their tires, were among the first industries to ship by truck. Today Akron is headquarters for nearly 100 motor freight companies with more than 15,000 trucks and trailers.

Also located here are two of the largest concerns in their respective fields - the Saalfeld Publishing Co., publisher of children's books, and the Enterprise Manufacturing Co., makers of world-famous Pflueger fishing tackle.

Metal working is another important industry. The units of this industry range from small tool and die shops to big factories producing machinery used in the rubber industry and other similar types of business.

Two big new industries recently located in northern Summit County a few miles from Akron. One is the new Chrysler Corporation stamping plant at Twinsburg and the other is the Euclid Division of General Motors Corporation, which manufactures road machinery, an industry expected to boom with the opening of the huge new federal highway program.
The diversified list of other products made in Akron area plants includes chemicals and plastics, salt, cereals, clay products, matches, paint and varnish, paper and boxboard, porcelain products such as glove forms and insulators, aircraft parts, heating and air-conditioning equipment, storm windows and doors, mattresses and upholstered furniture, concrete blocks, electric motors, wire drawing machinery, marine equipment, molds for rubber and plastic manufacturers, rubber toys, fabricated and wrought iron steel products, tools, both hand and power, and wood turnings.

Aside from its industrial importance, Akron is known as the host city for the All American Soap Box Derby and such famous golf events as the Rubber City Open, the new American Golf Classic, and the 1960 PGA Tournament.

Since 1933, with the exception of four war years, the ALL-AMERICAN SOAP BOX DERBY has carved a significant place for itself as a vital youth event in America. Each year, Akron, Ohio, the home of the ALL-AMERICAN, rolls out the royal welcome mat for more than 165 local champions from all over the United States and many foreign countries for this "greatest amateur racing event in the world."

The entire business district is lavishly decorated in Derby colors and banners, and Main Street becomes ALL-AMERICAN BOULEVARD for the festivities during "Derby Week." To make certain each "Champ" is identified to the tens of thousands of visitors that pour into Akron, giant placards along the Boulevard feature the name of each boy and the city or country he represents.

The Akron Chamber of Commerce, its committee, merchants and the entire community join together to make every Derby Boy feel that he is a true champion, for each entrant in the ALL-AMERICAN has earned the honor of competing for national recognition and over $15,000 in scholarships and other prizes by winning the grand championship in his local derby "back home."

The 170 Champs competing at Akron actually are representing some 50,000 boys who experienced the thrill of creating a racer with their own skill and ingenuity and entering in competition with other fine boys like themselves.
AKRON UNIVERSITY STUDENT CENTER

As a municipal institution serving a world famed industrial area, the University of Akron strives to provide an excellent academic education for the college-age youth of the community. In addition, the University provides facilities for adult education and many civic, cultural and educational community events.

Buchtel College, named for its most generous financial supporter, John R. Buchtel, became the core of the University of Akron in 1913 when all assets of the college were accepted by the City as a foundation upon which the new University would grow.

Today, students can earn bachelor's degrees in the Colleges of Liberal Arts, Engineering, Education, Business Administration and Law.

Masters' degrees are offered in all the colleges, through the Graduate Division. The Doctor of Philosophy degree is offered in Chemistry by the Buchtel College of Liberal Arts.

AKRON YMCA

The Akron YMCA serves more than 16,000 boy members in the Central Building and seven Youth Branches. The program features gym and swim classes, boys' clubs, hobbies and crafts, citizenship training, informal education, teen-age parties, and special family activities.
One of the finest examples of English Tudor Revival architecture in the United States, Stan Hywet Hall was built by Frank A. Seiberling, founder of the Goodyear and Seiberling rubber companies. It is a memorial to England's great Elizabethan period, a monument to America's period of great wealth, a collection of art treasures envied by museums and a place where history has happened.

The City of Cuyahoga Falls is blessed with an immense natural beauty and the people have capitalized on this beauty as part of the charm of both the modest and more elaborate homes. Interesting variety in style is seen as you drive throughout the community. The architectural types range from colonial to modern homes of steel and glass.
CUYAHOGA FALLS FIRE DEPARTMENT

Cuyahoga Falls has one of the most modern, completely equipped fire departments of any city of comparable size in the State of Ohio.

Because of the department's fine fire prevention program, the City enjoys an excellent fire safety record. Only three major fires have occurred in the past 30 years.

CUYAHOGA FALLS CITY BUILDING

As the county seat for Summit County (population 510,000) Akron is located in the market center of America, with 100,000 people within a radius of 500 miles having 75 per cent of the nation's buying power.

For prospective new industries and business ventures, Akron offers excellent plant sites, water supply, skilled labor, transportation facilities, accessibility of raw materials, abundant electric power at low rates, and a Chamber of Commerce working full-time with business, industry and government to promote Akron's great potential.

For additional information write the Akron Chamber of Commerce, 137 South Main St., Akron 8, Ohio.

CUYAHOGA FALLS, OHIO
"City of Homes"

Settled in 1812 as Manchester, changed to its present name in 1839 after the Cuyahoga River, which passes through the city, and has a fall of 240 feet within the city limits.

Located in the heart of the middle west industrial district with a population of over 50,000 in an area of thirty miles in radius.

Form of Government - Federal Plan of Municipal Government, City Bldg 2310 2d St.
Population - 47,705
Area - 9 square miles
Altitude - 1109 feet

Parks - Six parks, approximately 100 acres

Industry - More than 50 industries employing approximately 7,500 persons. Types of industry include rubber, wood products, plastics, machine tool, wire drawing machinery, staysbolts, laboratory and surgical tubing and chemicals.

Assessed Valuation - $102,000,000

Banks and Building and Loans - Four.
Telephones in Service - Approximately 13,000
Gas Meters in Operation - Approximately 10,000
Churches - 23 congregations of all denominations.

Education - One public high school, two junior high schools, eight grade schools and two parochial grade schools.

Hospitals - State Mental Receiving Hospital and Green Cross General Hospital.

Building and Construction - $9,571,000 covering 5100 permits.

Library - Taylor Memorial Public Library contains 33,500 volumes.

Transportation - Cuyahoga Falls is served by two railroads (Penna., and B & O.), and two bus companies.

City Statistics - Municipally operated Light, Water, Sewage, Cemetery, Incinerator and Garbage Pick-up 66 miles of hard-surfaced streets, 95 miles of sewers. Municipal Waterworks has a capacity of 3,500,000 gallons daily with 109 miles of mains. The incinerator has a daily capacity of 80 tons. Cost of Incinerator - $140,000. Municipal Swimming and Diving Pool - 324 feet long and 75 feet wide, has a capacity of one and one-half million gallons.

This section of the Directory contains the Advertisements and Professional cards of the more progressive business men, classified according to their respective line of business or profession. In brief, they are the men who are making business and history for Akron. Patronize them and you will be sure of a square deal.

We have on file in our Directory Library every issue of the Akron City Directory, beginning with the 1868 edition, down to the current issue. These volumes contain a wealth of information concerning the people who were listed in the Directory during the past 82 years. Persons listed in the earlier Directories are now only memories, but their listings in the Directory remain the same as when they were here in person.

These rare volumes, as well as hundreds of current Directories of other cities, are available for public reference, without cost,—just a part of our service.

KNIGHT-WARE CHEMICAL STONEWARE MFRS

KNIGHT-WARE PIPE AND FITTINGS

This quality chemical stoneware is not just surface resistant but is physically tough and corrosion proof throughout its entire body. It resists all acids and alkalies, hot or cold in any concentration.

Knight-Ware Pipe is available in a variety of standard fittings and can be installed by any competent plumber. Where special sizes are needed, they can be made at relatively low cost because no expensive molds are required.

Send for Bulletin No. 5

*Excepting HF and hot caustics

KNIGHT-WARE LABORATORY EQUIPMENT

Knight-Ware Laboratory Equipment has all the properties of Knight-Ware Pipe as given above. It is available in a wide range of standard and special designs including:

- Sinks
- Table Troughs
- Acid Lines
- Fume Ducts
- Tanks
- Kettles
- Sumps
- Suction Filters
- Jars
- Towers
- Valves
- Berl Saddles

Send for Bulletin No. 5

PYROFLEX CONSTRUCTIONS

The term Pyroflex Construction refers to complete functional units designed by Knight engineers which are built to handle almost any type of corrosive service. Besides Pyroflex, which is a Knight developed thermo plastic sheet lining, these units may incorporate ceramics, carbon, glass, graphite, plastics, lead or any other material best suited to the individual situation. Knight will design and build complete units or line large equipment in your plant.

Send for Bulletin No. 2

Acid Proof MORTARS

Knight has developed a line of special cements to meet almost any corrosive condition. PERMANITE cement used with acid proof brick provides a floor or tank lining that resists acids, alkalies, solvents, oil, grease, water and steam.

Send for Bulletin No. 4

Other types include:

- KNIGHT NO. 2-Silicate Base
- KNIGHTROBOND-Sulphur Resin Base
- KABO-Phenolic Base

Write for complete information

PYROFLEX LACQUER

Pyroflex Lacquer protects tanks and metalwork with a tough surface coating. It withstands severe corrosive conditions and may be applied by brush or spray to metal, concrete, wood or painted surfaces. Available in colors. Shipped in 1, 5 and 50-gallon containers.

Send for Bulletin No. 3

The Sign Over Your Door

Is a good thing, isn’t it? You would not think of doing business without it.

But it is only seen by those who pass your way.

If you could put a sign where everyone could see it would it interest you?

THE CITY DIRECTORY

Is where people look for you when they want to do business. You should make it easy for them to find you, by putting such information as a buyer wants, in the Directory properly indexed under all headings where he might look for you.

To be properly registered costs less than to be left out

The only complete line of production rotational molding equipment

The Akron Presform Mold Company is the only company with a complete line of production molding equipment, so as to provide just the right capacity machine for your production. Machinery so versatile that one operator can mold up to 2000 items per hour from any powdered, granulated or liquid molding compound. The operator need not be a technician, because all the raw materials are scientifically prepared, by the nation's foremost companies. Any hollow article can be molded from the raw material to a finished product in one operation. Our complete line of production rotational molding equipment assures the correct machine, dispensing unit and multiple cavity molds assembled onto our patented spider to satisfy your requirements.

The single spindle machine, shown at right, is available with a 15", 25", or 75" diameter molding area.

The multiple spindle machine, shown at left, is available with a 25" or 75" diameter molding area.

Write or call for detailed data or an appointment.

Advertisers Who KNOW

That which makes any advertiser's approval worth while is the prominence he has attained in his particular line of work.

The advertisers in the Directory are competent judges on the subject of advertising mediums—the fact that they approve of Directory advertising is evidenced by their continued patronage.

ADVERTISING with a PUNCH....
It's the punch that counts—in the right place. Your ad in the DIRECTORY will deliver the right punch in the right place.
STOP OR GO!

Red means Stop—Green means Go. Your ad in the Directory is the Green signal to Go—and the results will be a Green light all along the way.

DIRECTORY Advertising
PAYS DIVIDENDS
I AM

I sit in the castles of business and at the hearthstones of many homes, mighty in my power to serve.

Through me is the power to make people talk with intelligence concerning their communities.

With extended hand I guide the wearied traveler, and to others shorten the distances between destinations.

In me abides the essence of democracy, as side by side is found all nationalities, rich and poor alike.

With uncanny certainty I unite long-lost friends and make glad the missing heirs.

Through me are protected the law-abiding by tracing the criminal to his hiding place.

Through me, in the friendliest way, new trade channels are opened.

I am the key that unlocks the gate to what your community is, for all who would pass its portals.

I Am Your City Directory
High Hurdles....

In business as well as in sports there are High Hurdles to overcome. Your ad in the Directory, where multitudes will see it, will help to overcome many of the business hurdles.
SOMETHING
To Think About
For the Advertiser and the Consumer

Do you realize that an advertisement in the City Directory is a testimonial to the permanency and stability of the Advertiser?

A City Directory Advertiser is the logical one to patronize. This permanency and stability is your assurance of a square deal in buying merchandise or having work done.

It is a noteworthy fact that 90% of the City Directory Advertising is renewed from issue to issue.

There are dominant factors connected with City Directory Advertising: first, the low cost and staple publicity it affords, locally and nationally, second, this co-operation and patronage is wholly responsible for the very existence of the City Directory.

The modern City Directory is a wonderful asset, credit and benefit to the community it represents. In turn, that which benefits the community, automatically benefits the Advertiser.

Judicious Advertising is always a good investment, and City Directory Advertising, cost considered, renders larger returns than any other medium. In connection with the complete Classified Business section, it is doubly effective.

While we have offered you "Something to Think About," it is also something Worth Remembering.
