42. Further Description of Important Features
Lock is standard mitered gate type. The lock chamber is 90 feet long by 15 feet wide. The cut stone construction was covered with a facing of concrete c. 1905. Both gates are missing. There is water in the lock chamber. Lock is much overgrown with thickets, thus preventing a better photograph.

43. History and Significance
That portion of the Ohio & Erie Canal between Akron and Cleveland was opened July 4, 1827. For 30 years this waterway was a great controlling factor of increasing commerce, manufactures and population in Ohio, and no doubt played an important role in the growth of the Village of Boston, in which Lock 32 is located.

44. Description of Environment and Outbuildings
At the northern edge of the Village of Boston. The Boston cemetery lies to the west.
