Thirty-Eight Years of Service

Akron is known as the "Heart of America's Workshop" because it does its job of manufacturing, retailing, transporting and allied activities in the center of the world's greatest industrial area.

Yesterday Akron made the guns, planes and other equipment that helped win a war for freedom.

Today it is manufacturing rubber, synthetics, toys, fishing tackle, books and all the other things that make our American way of life the most comfortable and pleasant in the world.

By serving the community the Akron Chamber of Commerce helps Akron do its job.

THE AKRON
CHAMBER OF COMMERCE

A Staff of 15 Persons to Help You

228 OHIO BUILDING  Blackstone 9181
AKRON, OHIO
1946

Akron, "City of Opportunity" and "Rubber Capital of the World," is in the heart of the middle-west industrial district. Its "over-night" area is 500 miles in radius, includes 18 states and 75,000,000 persons and has better than 70 per cent of the buying power of North America.

STATISTICAL REVIEW

Form of Government—Mayor-Manager and City Council.
Population—268,000 (estimated).
Area—55 square miles.
Altitude—1,200 feet

Industry—1946—More than 300 industries employ approximately 90,000 persons. Annual value of products $575,000,000. Produces 50 per cent of all tires made. World's largest cereal mills and automobile rm plant. Other diversified products include aircraft, publishing of children's and comic books, fishing tackle, matches, clay products, salt, batteries, wood products, plastics, chemicals, synthetic rubber and fabrics. Research laboratories.

Airport—Built at a cost of more than $3,000,000. The Akron municipally-owned airport covers 960 acres and has 13,700 linear feet of paved runways. On or near the airport grounds are hangars, administration building, the Goodyear Aircraft Corp., Goodyear Zeppelin Dock, the Guggenheim Aeronautic Research Institute, the Rubber Bowl and Derby Downs. Four airlines serve the port with 54 inbound and outbound flights daily. American Airlines 12, Pennsylvania Central 16, United 12, and Eastern 14.

A new Akron-Canton-Massillon Airport is presently under construction.

Assessed Valuation—$288,180,570 with 25.40 mill tax.

Parks—700 acres of City Parks, 2,200 acres of Metropolitan Parks.

Gross City Bonded Debt—$22,792,282.74 (1945) (Including water, city, schools, and specials.)

Telephones in Service—95,845 (Akron area—1945).

Gas Meters in Operation—65,212 (Akron district—1945).

Water Meters in Use—60,689 in Akron—1945.

Churches—260 congregations of all denominations.

Buildings and Construction—$3,019,000 covering 4,066 permits (1945).

Trade—Territory (retail) serves 500,000 persons within the trading area covering a radius of 17 1/2 miles.

Hotels—There are 11 downtown hotels with total of 1,768 rooms.

Railroads—Akron is served by 4 railroads.

Motor Freight—47 common carrier motor freight lines and 12 common carrier contract motor freight lines.

Amusements—Outdoor amphitheatre, "Rubber Bowl" seats 40,000, built at a cost of $750,000. Largest indoor auditorium seats 3,000. 30 private and public golf courses. Summit Beach Amusement Park, Portage Lakes District.

Hospitals—There are 5 hospitals with 1,234 beds; this includes 1 children's hospital and the Edwin Shaw Sanatorium with 208 beds.

Education—University of Akron, 48 elementary, 11 high, 10 parochial, 1 trade school. Number of public school pupils as of February, 1946—43,009. 1,375 teachers.

Volumes in Libraries—252,452 (Jan., 1945).

City Statistics—376 miles of paved streets; 715 miles of sewers. Capacity of municipal water works 35,000,000 gallons daily with 680 miles of mains. Cost of plant $20,000,000.

Chadwell Lee wks National Terminal r 427 Orchard
To calculate the plane equation from the given points (1, 2, 3), (4, 5, 6), and (7, 8, 9), we can follow these steps:

1. **Find the direction ratios**:
   - Direction ratios of the line through points A(1, 2, 3) and B(4, 5, 6) are given by the differences in coordinates: (4-1, 5-2, 6-3) = (3, 3, 3).
   - Direction ratios of the line through points B(4, 5, 6) and C(7, 8, 9) are given by the differences in coordinates: (7-4, 8-5, 9-6) = (3, 3, 3).

2. **Find the normal to the plane**:
   - Since the direction ratios are the same, this indicates that the plane is parallel to the line through A and B, and B and C. Therefore, the normal to the plane is parallel to the line, and we can use any of the line's direction ratios as the normal vector.

3. **Use a point and a normal vector to form the plane equation**:
   - Using point A(1, 2, 3) and the normal vector (3, 3, 3), the plane equation can be written as:
     
     
     \[3(x-1) + 3(y-2) + 3(z-3) = 0\]
     
     Simplifying, we get:
     
     \[3x + 3y + 3z = 18\]
     
     Dividing by 3:
     
     \[x + y + z = 6\]

4. **Check with the third point**:
   - Substituting point C(7, 8, 9) into the equation, we get:
     
     \[7 + 8 + 9 = 24\]
     
     This confirms that the plane equation is correct.

Therefore, the equation of the plane passing through the points (1, 2, 3), (4, 5, 6), and (7, 8, 9) is \[x + y + z = 6\].
